**Letter of congratulation**

Vienna, Jan 30<sup>th</sup> 2018

Dear Sir, Madam!  
To whom it may concern!

EUCU.NET is a non-profit membership association that includes 67 institutional members from 30 countries. Our focus is on enhancing the idea of Children's Universities, which stands for innovative science engagement programs at universities for children and young people. Our approach is directly driven by the commitment to the Third Mission of universities and the social engagement with the society around them. This includes taking children and young people serious as actors in the dialogue between science and society and in the co-creation of knowledge. In this regard, Children's Universities are operating on the blurred edges of science, humanities, arts and economy.

Neaniko Kai Paidiko Panepistimio has been a founding member of EUCU.NET in 2010 and it is most committed to the idea of Children's Universities. With great pleasure we received the information that our member will be involved in the Olympia International Film Festival for Children and Young People. We appreciate this great cooperation and are looking forward to mutual enrichment and exchange arising from this endeavor for both spheres.

EUCU.NET is willing and able to support this endeavor. We will disseminate the idea of the Olympia International Film Festival among our members and we will let them know about any opportunity to get involved that appears evident.

With my kindest regards,

Chris Gary

General Secretary  
European Children's Universities Network – EUCU.NET
